

I am opposed to NAB's petition 04-160, which should be rejected by the FCC. Commercial radio lacks variety and the quality of its programming has become mediocre at best. This is largely due to consolidation in the industry that has been allowed by federal regulation. XM and Satellite radio offers variety and great programing and should offer traffic and weather channels. FM can't compete. Rather than try to improve their programing, FM wants to quash competition. If the FCC really believes in competition as it claims it does - then allow it and deny NAB petition 04-160. Thank you Don Mros
